We are dedicated to bringing you comprehensive market intelligence across Central and Eastern Europe. Each report is the result of six months of on-the-ground research with public authorities, C-level executives and industry experts.

Get your copy of Romania’s Energy Industry Report 2019 at IEAS in Bucharest on September 16th.

The time to invest is now.

DOUBLING DOWN ON NUCLEAR

Romania has relied for more than two decades on its coal-fired power stations for reliable energy supply and cheap electricity. The country’s market is dominated by the state-owned Complexul Energetic Hunedoara (CEH), which produces almost 90% of the country’s coal.

As the coal sector has had a major impact on the economy, it is at the heart of the national debate about Romania’s energy future. Two sorts of coal plants dominated the landscape of Romanian towns in the 1970s and 1980s, the state-owned Complexul Energetic Hunedoara -CEH- and the companies that were part of its group. It is this fact that the state has run out of lignite, the fuel that drove the Romanian industrial area, and has had to turn to other sources of energy. The phasing out of the coal power stations has been a major push for diversification of the energy mix, as the building up of renewables, the increase of the price of CO2 emission allowances within the EU ETS trading scheme reached in April 2019 €30, the national debate has been in favor of building new nuclear reactors in the short run.

The life-extension of Unit 1, commissioned in 1996, is planned to take place. In April 2019, the price of CO2 emission allowances within the EU ETS trading scheme reached in April 2019 €30, the national debate has been in favor of building new nuclear reactors in the short run.

Romania’s Energy Industry 2019

The coal sector has had a major impact on the economy, it is at the heart of the national debate about Romania’s energy future. Two sorts of coal plants dominated the landscape of Romanian towns in the 1970s and 1980s, the state-owned Complexul Energetic Hunedoara -CEH- and the companies that were part of its group. Investment Reports is the premier B2B publication for energy markets across Central & Eastern Europe, founded by seasoned analysts with accumulated experience across five continents.

Our mission is to generate authoritative, objective and useful reporting for business leaders around the world.

We publish 100% original content and use a unique methodology, based on exclusive interviews with business executives, government officials, and industry experts.

We act as a powerful, targeted instrument to connect decision makers in the energy sector, fostering an ideal network to grow your brand.
Investment Reports will launch Poland’s Energy Industry Report in April 2020, the most comprehensive analysis of CEE’s largest economy done to date.

Given the country’s dominant coal dependency, the subject of a just and sustainable energy transition balancing traditional fossil fuels, renewables and potentially nuclear energy is crucial not only to Poland’s future, but also of the European Union.

This and other exciting developments will be discussed by Investment Reports’ analysts with the movers and shakers of Poland’s energy market over the course of six months, from government officials to executives from leading coal & mining, oil & gas, renewables and technology companies.

LAUNCH DATE: APRIL 2020

KEY TOPICS COVERED:
- Resource Mix & Energy Transition Strategy
- Legislation & Regulatory Bodies
- Production Capabilities
- Transport, Distribution & Supply
- Engineering & Technology
AUDIENCE REACH
DIGITAL DISTRIBUTION
418,000 Business Readers

Investment Reports Digital Network

2,400+ C-Level subscribers
Our database includes government officials, industry experts and CEOs we met personally during face to face interviews.

Our readership profile is spread across key industries:
71.6% Energy & Mining
16.9% Pharmaceuticals & Chemicals
11.5% Aerospace & Automotive

Global Energy News

85,000 targeted C-Level energy readers
The audience consists of industry experts, government officials and think tanks from all around the world.

EU Business News

108,000 C-Level business readers
CEO’s represent 46.2% of the readership, while the rest 53.8% of the audience is comprised of CFOs, CMOs etc.

225,000 business leaders targeted through an exclusive digital campaign

We teamed up with Europe's number one news channel.

This partnership offers our advertisers the unique opportunity to gain visibility directly on the Euronews website through custom content.
6,000 C-Suite Readers Worldwide

*1,000* Copies sent to international trade events

*500* Copies sent to interviewees, government officials & industry associations in Poland

**PARTNER EVENTS**

- **EuroPOWER Energy**
  - April 2020
